Madison, WI 53707-7921

Subject: Response to Wisconsin Department of Natural Resources December 2, 2010 letter regarding City of Waukesha Application for Lake Michigan Supply

Dear Mr. Johnson:

In response to the Wisconsin Department of Natural Resources (WDNR) initial review of the City of Waukesha (City) Application for Lake Michigan Supply, the City developed the enclosed supplemental technical information. The response is organized by topic, as set forth in the WDNR December 2, 2010 letter: return flow, water supply alternatives, and water conservation and efficiency. In conjunction with the WDNR review of this submission, the City will update its Application (May 2010) and appendixes to reflect these materials and any follow-on review comments from WDNR.

The City appreciates the contributions WDNR technical staff have made to the December 2, 2010 letter, the clarification they have provided while we have developed this response, and the time they will spend reviewing the attached information. The City looks forward to the continued advancement of the Application.

Sincerely,

Daniel S. Duchniak, P.E.
General Manager
