Welcome to the GIFTS

6.5 Reports Library

Thank you for choosing GIFTS!™ In addition to the reporting features available in the GIFTS Organizer, GIFTS includes a library of more than 200 reports that have been designed to meet the needs of most grant makers.

This manual describes how to run these reports and includes sample reports that you can use to find the GIFTS reports that best meet your needs.

Where to Find the Information You Need

The information you need depends within your organization's workflow for using GIFTS. Please use the following descriptions to determine how to best use this manual.

All users: All users should read "How to Use the Sample Reports" on page xi for an important overview of the terms used in this manual. Then, read "About GIFTS Reporting" on page 2 for an explanation of the GIFTS reporting options.

If you want to find out what reports are available: You can browse through the report listings in "About GIFTS Reporting" on page 2 for descriptions of the available reports. Each report listing includes a cross-reference to the sample report that you can look at to see exactly what data is included in the report.

In addition, you can look for reports in the index at the end of this manual.

If you want to know how to run a GIFTS report: Read "How to Use the Sample Reports" on page xi for an important overview of the terms used in this manual. Then, refer to "Running GIFTS Reports" on page 31 for complete instructions for running reports from the GIFTS Report Library.

If you want to run a Budget report, please refer to the *Budget Module User's Guide* for information about running the Budget reports.

If you're responsible for setting up the GIFTS Report Library: Read "About GIFTS Reporting" on page 2 and decide which reports are the most useful for your organization. Then, read the "Managing the GIFTS Report Library" chapter of the *Administrator's Guide* to find out how you can tailor the Report Library to meet your organization's needs.

How to Use the Sample Reports

The sample reports in this document are divided into the categories in which they appear in the GIFTS Report Library. You can browse through the lists beginning on page 6 to find reports that meet your needs.

Each sample report includes information about the *fixed criteria* that apply to the report and, if the report belongs to a *series*, the available variations of the report. Series and fixed criteria are described in the following sections.

About Series of Reports

For many reports, the report library includes several grouping variations that comprise a *series* of reports. For example, the 'Declinations - Alpha List' series of reports includes the following reports:

- Declinations - Alpha List*
- Declinations - Alpha List by Fund*
- Declinations - Alpha List by Geographical Area 1*
- Declinations - Alpha List, by Program Area 1*
- Declinations - Alpha List by Reason*
- Declinations - Alpha List by Staff*
- Declinations - Alpha List by Type*

These reports include identical information; the only difference is the way in which the records are *grouped*. For report series, this document includes one variation of the report as an example and lists the other variations in the series.

About Report Names

As described in the *Administrator's Guide*, your GIFTS Administrator can modify the names of the standard report. The report names in this document are the names shipped with the GIFTS product; the names in your system may be different if your Administrator has edited them.

The GIFTS Administrator can add and remove reports from your Report Library, so not all of the reports in this document may be available. If you

would like to use a report and cannot find it in your system, please contact your GIFTS Administrator.

About Fixed Criteria

Many reports have been designed to include only specific information. For example, the 'Declinations - Alpha List' reports only include Requests with a Disposition of Declined. Pending Requests and Approved Requests are not included in the report.

These *fixed criteria* always apply to the report, regardless of the search criteria that you choose when you run the report. If a report has fixed criteria, they are noted in the sample report.

About Saved Search Criteria

Your Administrator can create new reports by attaching saved searches from GIFTS to the standard reports described in this publication.

Example: The standard reports library includes an "Alpha List of Grantee Organizations" report that lists all Organizations in the GIFTS database that have received funding. By attaching a saved search for Organizations coded as 'Arts & Culture' to this report, your Administrator can create an "Alpha List of Arts Grantees" report.

Refer to the *Administrator's Guide* if you want to attach a saved search to a standard report. Note that you can also specify search criteria when you run reports, as described in "Running GIFTS Reports" on page 31.

How Records are Sorted

Unless otherwise noted, all reports sort records alphabetically by Organization Sort as Name.

Currency and Date Formats

The currency and date formatting of the reports is determined by Regional Settings Control Panel of Microsoft Windows. The sample reports in this

document were produced on a system with the Regional Settings set to “English (United States).”

Conventions Used in This Manual

Before you read *Using GIFTS Reports*, it is helpful to familiarize yourself with the conventions used throughout this manual. Doing so will enhance the usefulness of the documentation.

Procedural and Typographic Conventions

Procedural conventions help identify procedures and tasks you’ll perform.

- ❖ Important procedures are always given as a numbered set of tasks.
- ❖ Check marks indicate a checklist of general items or tasks.
- ❖ Characters given in this font are examples of data that you should enter, such as the directory path to a file.
- ❖ Data elements within the GIFTS system are presented with an Initial Capital Letter. For example, the word “request” is capitalized when it is used to refer to a Request record within GIFTS.

Different Types of Notes

When appropriate, notes provide additional information or warnings that may apply to you. *Using GIFTS Reports* uses four types of notes. Each type of note serves a unique purpose as defined below.

Note: A note with this format and the heading “Note” provides information that applies to some users. Notes apply to special situations. For example, a Note might explain minor differences in setup procedures among network and standalone systems.

Important: A note with this format and the heading “Important” provides information that applies to all users. This type of note provides information that is essential to the completion of a task. Unlike a Note, Important notes should not be disregarded.

Caution: A note with this format and the heading “Caution” provides important information that applies to all users. Pay special attention to these notes.

Tip: A note with this format and the heading “Tip” provides useful information that applies to most users. Although Tips are not essential to the completion of a task, they provide alternative methods, shortcuts, or special applications relating to the procedures in the text.

Maintenance and Support Program

Members of MicroEdge’s Maintenance and Support Program receive unlimited telephone consultation on the use of the software, assistance in error isolation and correction, prompt furnishing of any available problem solutions relating to the currently supported versions of GIFTS, and software updates.

Our toll free Technical Support hotline is available Monday through Friday, 9:00 A.M. to 8:00 P.M. Eastern time. You may contact MicroEdge's Technical Support Specialists as follows:

Phone	1-877-704-3343
Fax	(212) 757-1784
E-mail	helpdesk@microedge.com
Web	From the GIFTS menu, choose Help ► Technical Support

Note: To access the Web, you must have an Internet connection (either a LAN connection or a dial-up connection) and a frames-enabled browser (Microsoft Internet Explorer 7.0 or later).

For details about our support policies, please refer to the *MicroEdge Client Resource Guide*. If you have any questions regarding the Maintenance and

Support Program, please contact our Client Administration Representative at 1-800-899-0890, option 6, then 2, who will be happy to assist you.

Using the Documentation Included with GIFTS

MicroEdge provides you with the GIFTS documentation in Portable Document Format (PDF). To view these files, you will need to install Adobe®'s Acrobat® Reader, which is available for free from Adobe Systems, Inc. at <http://www.adobe.com>.

You can print out selected pages, sections, chapters, or the entire book. You can also install the files on your computer or network so you can access them online, and take advantage of features such as a “hot” table of contents, index, and cross-references within books.

Note: Acrobat Reader's other features are described in the Reader's online Help. Note that MicroEdge does not provide technical support for the Acrobat Reader. We cannot assist you with the installation, configuration, or use of this product.

About GIFTS Reporting

One of the most important functions of any database system is the ability to arrange and present the data you have entered in useful ways. GIFTS and Essential GIFTS include an extensive library of standard reports.

The GIFTS Report Library includes two types of reports:

- ❖ **Standard Reports**—More than 200 pre-built standard reports designed to meet the needs of most grant making organizations are installed with your system. These reports have been designed to complement the functionality of GIFTS in a way that is beneficial to the largest number of users. Standard reports answer common queries, some of which are general in nature and some of which are more specific.

Example: The “Alphabetical List of Grants” report lists grants in alphabetical order to answer the query “Which projects have we funded?” When you run this report, you can further define it to answer a more specific query, such as “Which projects have we funded *in Arts and Culture?*” You can choose the specific data you wish to see for all reports.

- ❖ **Saved Organizer Reports**—Saved Organizer reports are ad hoc reports designed by individual users, with a large degree of control over formatting and layout. As with saved views and searches, saved Organizer reports may be either public or private. For details on creating and saving Organizer reports, you should refer to the *GIFTS User’s Guide*.

Note: If you are running Essential GIFTS, you cannot save Organizer Reports to the Report Library. Instead, you can save Organizer Views to re-run your ad hoc reports in the future.

In order for you to make the best use of your data, it is helpful to have a thorough understanding of the available standard reports and how the data you enter is reflected in these reports. Reviewing the sample reports may provide you with ideas about using areas of GIFTS that you haven’t yet explored. It will also allow you to determine what types of Organizer reports you will want to create.

Ad Hoc Reporting

You can use the GIFTS Organizer as an *ad hoc* reporting tool to print and export data, as described in the *GIFTS User's Guide*. Once you have set up an ad hoc report, you can save the content, sort order, grouping, formatting, and print options as an Organizer report in the Report Library. Then, you can run the report quickly from any tab of the Organizer.

Note: If you are running Essential GIFTS, you cannot save Organizer Reports to the Report Library.

Custom Reports

GIFTS provides you with great flexibility for creating and saving customized reports. However, if you need help customizing specific reports or creating new reports, you can retain MicroEdge to accomplish this. The cost of this service varies depending on the level of complexity of the required reports. For more information, please refer to our *Client Resource Guide* or contact our Programming Services Department at 1-800-899-0890.

About Report Categories

In order to provide the most intuitive access to reports, the Report Library is divided into tabs representing the same categories of GIFTS data as your Organizer folders. You should note that not all categories will be available to all users, as some depend on your system configuration.

Tip: Categories with no reports defined for them will be hidden in the Report Library. Affiliations and Reviews are initially hidden, for instance, because they contain no standard reports when GIFTS is first installed. Categories will also be hidden if you remove all of their reports through the GIFTS Administrator.

Any combination of the following categories may be available in your Report Library:

Category	Description
Favorites	For convenience, you can add the reports that you use most often to the Favorites category. A Favorites list is maintained for each GIFTS user.
Organizations	Organization reports are designed to provide information on the organizations in your database. These reports are useful for displaying address, tax status, and other details about Organizations. Since organizations are attached to the funding requests they have made, information about an Organization's funding history is also available on several Organization reports.
Requests	Reports about the requests for funding in your system. Some reports display detailed information on each Request, while others summarize Request information in meaningful ways. Request reports include information on grants, declinations, and proposals—though many Request reports are designed to include only specific information. For instance, the 'Declinations by Reason' report only lists Requests that have been Declined.
Financial/ Payments	A variety of ways to look at your financial data. Most reports detail Payment information that you can use to review your financial history or plan future commitments.
Contacts	<i>Hidden for Essential GIFTS users without the Contacts Manager option.</i> Detailed information about your contacts, and special reports for printing comprehensive lists of contacts for projects or organizations.
Affiliations	<i>Hidden for Essential GIFTS users without the Contacts Manager option.</i> Used to save user-defined reports created in the Affiliations folder of the Organizer. Affiliation reports can provide details about your contacts' relationships with various organizations and grant requests.
Activities	<i>Hidden for Essential GIFTS users without the Calendar option.</i> To-do and scheduling reports.
Requirements	Reports on requirements due from grantee organizations.
Documents	<i>Hidden for Essential GIFTS users without both the Correspondence Module and the Document Manager option.</i>

Category	Description
Budget	<i>For users of Budget Module only.</i> Budget reports can be run from both GIFTS and the optional GIFTS Budget Module. They contain detailed and summary information on budget figures, as well as comparisons between the budget vs. actual information.
Matching	<i>For users of Matching GIFTS only.</i> Reports related to matching gifts programs, including detailed and summary lists of gifts, donors, and recipients.
Volunteer	<i>For users of Volunteer GIFTS only.</i> Reports related to volunteer gifts programs, including detailed and summary lists of gifts, donors, and recipients.
Donors	<i>For users of Employee GIFTS only.</i> Reports related to donors participating in either Volunteer GIFTS or Matching GIFTS programs.
Reviews	<i>For users of the Reviewers Module and/or ReviewerCONNECT only.</i> Used to save user-defined reports created in the Reviews folder of the Organizer.

About Fixed Criteria

Many reports have been designed to include only specific information. For example, the 'Declinations - Alpha List' reports only include Requests with a Disposition of Declined. Pending Requests and Approved Requests are not included in the report.

These *fixed criteria* always apply to the report, regardless of the search criteria that you choose when you run the report. If a report has fixed criteria, they are noted in the sample report.

Organization Reports

The following standard reports are included in the Organization folder of the GIFTS Report Library.

Time Saving Tips	45

Reporting at a Glance

The following are the basic steps for choosing and running a report.

1 Choose a report.

From the list of available reports on your system, choose a report. For example, the “Grants – Alpha List.”

2 Specify the search criteria.

In most cases, you want to limit the amount of data included in your report. For example, you might want to show only grants that were approved during the current quarter instead of all the grants in your database.

You can use Quick Find, an Advanced search, or your saved searches to specify the *search criteria* that limit the data included in the report.

3 For Financial reports, choose the ‘as of’ date.

Many financial reports produce information specific to the date in which they are run. For instance, the “Schedule of Appropriations and Payments” reports are used to generate year-end tax reports. To run these reports for the year 2000, you would run them ‘as of’ December 31, 2000.

4 Edit the report title.

Each report has a default title that is displayed at the top of the report. You should edit the title to ensure that it properly reflects the search criteria and, if applicable, the ‘as of’ date you have used to generate the report.

5 Run the report.

The report is displayed in the report viewer. You can print it or export the report data in a variety of data formats.

Step 1: Choosing a Report

The first step in running a report is to choose the report that provides the information you need. You can use the list of reports in “About GIFTS Reporting” on page 2 on the sample reports in this publication to find the reports that best suit your needs.

The standard reports are organized into separate Categories, each of which is represented by a folder in the Report Library. To access the Report Library from the Organizer or Calendar, choose View ► Reports from the Main menu.

When you are in Report Library, the Organizer view remains open unless you close it first. You can switch back and forth between the Organizer and the Report Library using the View menu or the Windows® task bar at the bottom of your screen.

Folder	Description
Favorites	You can add frequently-run reports to this folder by selecting a reports and choosing Favorites ► Add to Favorites from the Report Library menu. GIFTS maintains a list of favorites for each user.
Organizations	Reports that list and profile Organizations. You can also create mailing labels for Organizations. For samples of these reports, please refer to “Organization Reports” on page 45.
Requests	Reports that contain detailed information on your Requests, including status reports and reports that can be used to prepare the agenda or minutes for your Board meetings. Most Requests reports include Requests of a specific Disposition: For example, “grants” reports include Approved Requests only. For samples of these reports, please refer to “Request Reports” on page 55.

Folder	Description
Financial	Reports that detail Payment information for financial purposes. Reports for both scheduled and paid Payments are included, as well as long-range financial analysis reports. For samples of these reports, please refer to “Financial Reports” on page 89.
Contacts	Reports that provide detailed information on Contacts, including comprehensive lists of Contacts for projects or Organizations. You can also create mailing labels for a particular project, Organization, or mailing list.
Activities	The Activities reports encompass To Do Activities like telephone calls and meetings, and reports on Requirements that are due or completed. Note that for Essential GIFTS systems without the Activity Tracking option, this folder is for ‘Requirements’ only.
Matching	<i>For users of Matching Gifts only.</i> Reports related to matching gifts programs, including detailed and summary lists of gifts, donors, and recipients. For samples of these reports, please refer to “Matching GIFTS Reports” on page 159.
Volunteer	<i>For users of Volunteer GIFTS only.</i> Reports related to volunteer gifts programs, including detailed and summary lists of gifts, donors, and recipients. For samples of these reports, please refer to “Volunteer GIFTS Reports” on page 179.

Note: The reports and report titles in this publication do not necessarily match those on your system. Your Administrator may have chosen to omit the reports that your Organization doesn’t use, or he or she may have added reports to your library.

Tip: If you run a report frequently, click Add to Favorites to add it to the Favorites folder. GIFTS maintains a separate list of favorites for each user.

After you choose a report from the list, the report options are enabled. The following sections describe these options in the order in which they should be approached.

Option	Description
 Run Report	Run the report and display the results.
 Edit Report Title	Modify the title of the report. Each report has a three-line title that includes the main title, which appears in large, bold letters at the top of the report, and two subtitles. By default, the main title is set to the name of the report you chose, and—if your Administrator has set up the system to do so—the first subtitle displays the search criteria, if any, that you specified.
 New Search Criteria	Choose the search criteria that determine which records are included in the report. For instance, if you are printing a grant report and wish to see only grants from the year 2000, you use search criteria to tell GIFTS that you only want year 2000 grants in the report.
 Select Saved Search	Retrieve search criteria that were saved by you or another user. (You can save commonly-used criteria so that you don't have to re-create them each time you want to run a commonly-used report.)
 Save Current Criteria	Save the current search criteria as a saved search.
 Clear	Clear the report search criteria.
 Add to Favorites	Put the report into your Favorites folder.
Report Template	If you have the optional Report Designer, you can choose Tools ► Report Template to launch Crystal Reports and open the report template for editing.

Step 2: Specifying Search Criteria

Many report templates have *fixed search criteria* that select only specific records to include in the report. For instance, the “Alpha List of Grants” report only selects Requests that are Approved. By providing additional search criteria, you can further limit the scope of a report.

The search criteria tell GIFTS that out of all the records in your database, you only wish to see a specific subset. For instance, only the grants with a Grant Amount greater than \$50,000.

Note: Your Administrator can “attach” saved searches to reports in the Report Library. When you select a report, check the ‘Specify Search Criteria’ area of the Report Library window to see if search criteria already apply to the report.

Check here to see if your Administrator has attached search criteria to the report.

If you do not want to use the search criteria shown, you can choose Edit ► Search ► Clear Search from the Report Library menu to clear the search.

About Search Criteria

To create your search criteria, you can use the same search features that you use in the Organizer. The principles are the same—the only difference is that instead of choosing the records to be displayed in the Organizer grid, you’re choosing the records to be included in a printed report.

Tip: The search criteria do not modify the format or structure of Standard Reports; they determine which records appear in the report.

Note: If you use branch security, your reports do not include data that you do not have permission to see.

About Financial Reports and Search Criteria

Many Financial reports display a summary of the payment history for your grants. To be accurate, these reports must include the entire history of the grant's payments.

If your search criteria limit the report to payments within a specific date range or within a Fiscal Year—and only part of a grant's payments fall within your search criteria—GIFTS includes the grant's entire payment history in the report even if not all of the grant's payments meet your search criteria.

Example: The Five Year Payment History report shows, for each grant in the report, the Payments made within the last five years (see page 96). If you use the 2001 Fiscal Year as your search criteria and a grant is included in the report because you made payments on it in 2001, payments made in prior years are also included in the report. Therefore, the payment history is accurate even though not all of the grant's payments were made in the 2001 Fiscal Year.

The following Financial reports, which summarize payment information by grant, are designed to work in this manner; in contrast, *reports that list individual payments instead of a grant's payment history only include payments that meet your search criteria.*

- ✓ Cash Flow Analysis
- ✓ Five Year Payment History Report
- ✓ Grant Commitment Schedule
- ✓ Grant Payment Summary
- ✓ Grant Planning Worksheet
- ✓ Schedule of Appropriations and Payments

About Saved Searches

You may find that you spend time composing a complex search query, and then find that you need to build it all over again when you need to run the same query again later that day or the next day. Alternatively, you may choose records for a Standard Report and then decide that you'd like to work with the same group of records in the Organizer.

GIFTS allows you to save search queries for use at any time, and you can share Quick Find searches between the Report Library and the Organizer. In addition, you can make your saved searches available to other users.

Saved searches are specific to the folder in which they were created because there is different information available in each folder.

When you share a saved Quick Find search between the Report Library and the Organizer, it is available in the same Report or Organizer folder in which it was created. For example, a search created in the Requests folder of the Report Library is also available in the Requests folder of the Organizer.

Searches for the Organizer's Payments folder are shared with the Financial reports folder, and vice versa. For detailed information about saving, modifying, renaming, and deleting saved searches, please refer to the *GIFTS User's Guide*.

Note: Because the search information is different for each folder, you cannot cut and paste Advanced search criteria between folders, and you cannot share Advanced searches between the Organizer and the Report Library.

Choosing the Search Criteria for a Report

To create or edit the search criteria for a report, choose Edit ► Search ► New Search or Edit ► Search ► Edit Search from the Report Library menu. The Quick Find window for the folder you are in is displayed.

Use Quick Find or the Advanced search to create your criteria, just as you would in the Organizer. For an overview of the Quick Find and Advanced search facilities, please refer to the *GIFTS User's Guide*.

Note: You cannot use Customizer fields as search criteria for a report.

When you are finished creating your search criteria, click Find Now to return to the Report Library.

Note that the Quick Find properties available for each Report folder are the same as those found in the Organizer folders. For example, the Requests folder of the Organizer and the Requests folder of the Report Library use the same Quick Find properties. The Organizer's Payments folder and the Report Library's Financial folder share the same Quick Find properties.

Note: If you select another report in the same Report Library folder, the search criteria you created are not cleared; this allows you to run more than one report without having to re-enter your search criteria. You can clear the search criteria at any time by choosing Edit ► Search ► Clear Search from the Report Library menu.

Applying Saved Criteria to a Report

To use saved search criteria for a report, choose Edit ► Search ► Select Search from the Reports toolbar to choose a saved search. Note that the GIFTS Administrator can attach a saved search to a report so that it is automatically used when you choose the report.

Note: If you select another report in the same Report Library folder, the search criteria are not cleared; this allows you to run more than one report without having to re-enter your search criteria. You can clear the search

criteria at any time by choosing Edit ► Search ► Clear Search from the Report Library menu.

Step 3: Setting the ‘as of’ Date for Financial Reports

Many financial reports produce information specific to the date in which they are run. For instance, the “Schedule of Appropriations and Payments” reports present a picture of your financial history for the current year.

In many cases, you may want to produce financial reports of this kind after you have closed out a particular year. For instance, in the first few months of any new year, you may wish to produce reports on last year’s giving for the IRS.

For this reason, an ‘as of’ date setting is available for all of the financial reports in the Standard Report Library.

When you set ‘as of’ date to a date other than the current date, your reports are affected in the following ways:

- ❖ If the report automatically selects information relevant in the “Current Year,” the current year is based on the ‘as of’ date, not the current date.
- ❖ If the report includes columns for future or past years, or future or past months, these columns are automatically adjusted based on the ‘as of’ date.
- ❖ Reports that include ‘Scheduled’ Payments include payments that have a Status of Paid, but for which the Payment Date is after the ‘as of’ date.
- ❖ Reports that include ‘Paid’ and ‘Refund’ Payments exclude these Payments if their Payment Date is after the ‘as of’ date.
- ❖ Payments for Requests that were approved after the ‘as of’ date are excluded from the report, regardless of their actual Schedule or Paid dates.

- ❖ Payments that were voided after the 'as of' date are reported as being 'Paid.'

The financial reports have been designed to recreate your data based on the 'as of' date, but some data—once it is altered in GIFTS—cannot be restored to its past condition; therefore, the results of reports run with the 'as of' date may not completely represent a version of the financial data as of that date. The following data cannot be accurately recovered based on 'as of' date.

- ❖ Payments that have been deleted are not reflected.
- ❖ Payments for which the amount changed between the 'as of' date and the current date report the current amount, not the previous amount.

Important: Custom reports created by MicroEdge, the Report Designer, or any third-party report writer may not have been designed to take advantage of the 'As of' date functionality.

Step 4: Editing the Title of the Report

The GIFTS reports have three-line titles: a large heading in bold and two subheadings, as shown in the following sample.

Declinations - Alpha List		
Proposals Declined in Calendar Year 1999		
Grouped by Staff		
5/9/00		
Organization	Primary Contact	Reason
Project Title		

GIFTS provides a default title for the report based on its title in the Standard Report Library, and—if your Administrator has set up the system to do so—defaults the first subtitle to the search criteria you have chosen.

You can alter the main title and enter the subtitles necessary to reflect the search criteria that you use when running the report. Therefore, anyone who reads the report will know exactly what he or she is looking at.

To edit the title, choose Edit ► Report Title from the Report Library menu. In the following example, the subtitles indicate that the report only includes grants from the calendar year 1999.

When the title information is complete, click OK to save your changes. Having chosen a report, your search criteria, and the report title—you are ready to run the report.

Step 5: Running the Report

Before You Begin: Be sure that you have completed the preceding four steps, and that the report title properly reflects your search criteria.

Viewing the Report

To view your report after you have specified the necessary options, choose File ► Run Report from the Report Library menu. The report is generated and displayed in the report viewer.

Note: The total number of records displayed on the viewer toolbar is based on the internal structure of the report. This total often differs from the “Grand Total” count in the report itself, which may be based on different criteria.

You can use the viewer's toolbar to navigate within the report.

Icon	Name	Description
	Beginning of Report	Go to the first page of the report.
	Previous Page	Go to the previous page.
	Next Page	Go to the next page.
	End of Report	Go to the end of the report.
	View	Set the percentage of the zoom.

Important Note to Client/Server Users: The End of Report button *terminates* the report if you click it while the report is still processing. For instance, if you click this button while an alphabetically-sorted report is in progress, it truncates the report so that only records between A and F (for example) are shown. Note that the report is not necessarily finished processing when the first page is displayed; wait until the toolbar indicates that the report is “100%” complete.

Printing the Report

When the report has finished processing, you can print it by clicking the Print button on the viewer toolbar.

Exporting the Report

When the report has finished processing, you can export it to a variety of file formats appropriate for word processors, spreadsheets, Internet browsers, and other applications.

To export a report, click the export button on the report viewer toolbar. You are prompted to choose an export format and a filename for the exported data.

Note: GIFTS reports have been created using Crystal Reports®, and the export function of the report viewer is a function of Crystal Reports. Business Objects, the maker of Crystal Reports, documents many limitations to the export feature due to the significant differences between Crystal Reports and the software packages to which it can export.

In particular, reports that are exported to Microsoft Word® may require extensive reformatting. If this is the case, consider exporting your report to another format, such as Microsoft Excel, that may retain more of the formatting that you need.

Running Quick Reports

You can now automatically populate the Reports Library with selected Record IDs as the search criteria. For example, if you are in the Requests folder and have selected three Requests, you can run a quick report, which displays the Report Library with the three Request's Request IDs automatically populated as the search criteria. This allows you to save time when running reports for specific records.

Note: In order to use this functionality, the Enable Quick Reports option in the General Preferences of the Administrator module must be selected. For more information see the *Administrator's Guide*.

The image below displays the Report Library with three Request ID's automatically populated as the search criteria.

Important: This specific functionality only works in the Reports Library if you press [Ctrl] + T or go to View ► Quick Reports. If you go to View ► Reports or click the Reports icon from the toolbar, this functionality does not work, regardless of what records you have selected.

To run a quick report with automatically selected search criteria:

- 1 From the GIFTS Organizer, select one or more records.

Note: You can select up to 250 records.

- 2 Press [Ctrl] + T or go to View ► Quick Reports. The Reports Library displays with the selected record IDs as the search criteria.

- 3 Select a report using the Select a report to run menu.

Tip: To select a report quickly, you can press [Tab] and then use your up and down arrow keys to scroll through the report list.

- 4 Run the report.

Time Saving Tips

Use the following GIFTS features to make reporting fast and easy:

The Favorites Folder Add frequently used reports to the Favorites folder for easy access.

Save Your Searches If you frequently use the same search criteria for your reports, don't forget to save your searches for later use.

Attach Saved Searches If you always run a report with the same saved search, ask your Administrator to add a report to the library that has the saved search attached to it. Then, you won't have to choose the saved search when you run the report.

Reporting from the Organizer Don't forget that you can also print and export reports from the GIFTS Organizer. Use the Organizer Views to save your own *ad hoc reports*.

Foundation Center Export

You can use this report to export your grants information to an electronic file for submission to the Foundation Center.

What Data is Exported to the Foundation Center?

This report is formatted according to the center's requirements, and includes the following information about each grant (Approved Request) included in the report. For each grant, the following information is exported about the grantee Organization:

❖ Organization Name	❖ Organization A.K.A. Name
❖ Organization Mailing Address (Note: This includes Street Address, City, State, and Postal Code. Country is included if Organization is located outside of the U.S.)	❖ Organization telephone number
❖ Organization Type	❖ Organization Tax ID
❖ Organization WWW Address	

The following information is exported about each grant:

❖ Request Project Title	❖ Request ID
❖ Grant Fiscal Year	❖ Grant Amount
❖ Grant Term (in months)	❖ Whether or not the grant is renewable
❖ The Department or Division of the grantee Organization to which the grant was made (as indicated in the Subdivision field of the grant's Request record).	❖ Payee Organizations

In addition, the export includes all levels from each of the following classifications on the Request's Coding Sheet:

❖ Program Area	❖ Population Served
❖ Geographic Area Served	❖ Type of Support

❖ Gender	❖ Age
❖ Ethnicity	

To Run the Foundation Center Export Report

To create an export file for the Foundation Center:

- 1** Go to View ► Reports.
- 2** From the Requests folder, choose the Foundation Center Export Report.
- 3** If necessary, specify the grants you wish to include in the export using the New Search or Select Search buttons.
- 4** Click the Run selected report icon. The report is generated and displayed using the Crystal Reports viewer. Please note that since this file is intended for export, it is not formatted for printing.
-  **5** When the report has finished processing, click the Export Report button on the Crystal Reports viewer toolbar located at the top of the report. You are prompted to choose a file format and destination for the export.
- 6** Choose 'Tab Separated Text (TTX)' as the format, and 'Disk file' as the destination. Click OK. You are prompted to provide the file name and location for the export file.
- 7** Enter the file name and location, and click Save. The export file is saved, and you can transmit it to the Foundation Center.

Project Desc:	This library restoration project is scheduled to be completed by June 2000. It was originally scheduled for completion in January, but due to inclement weather the start date has had to be pushed back to July, 1999. The library that is being restored was built in 1965. Although it served the school well to date a recent earthquake has destroyed a portion of the facility making it unsafe for use. Although the school does have another library for the students to use this project remains important not only for the historic preservation of the building but also to allow the dental students access to a library designed specifically for their use.

Grants - Alpha List with Secondary Codes

The “Program Area Served with Secondary Codes” and “Geographical Area Served with Secondary Codes” variations of the “Grants - Alpha List” report include both primary and secondary coding for all levels of the Program Area or Geographical Area Served table.

A grant may be listed in the report several times—once for each code. Note that since reports may be listed more than once, the totals in this report may not reflect the actual amount granted.

Fixed Criteria

Requests with a Disposition of Approved and which have classifications in the tables on which the report groups.

Grant Continuity Schedule in Local Currency

If you use GIFTS multi-currency features to track grant amounts in other currencies (based on currency exchange rates saved in the Administrator Module), the Grant Continuity Schedule reports provide information about grants' balances, Payments, Amendments, and other changes in either your functional currency or the grants' local/other currencies.

About the Report

This report is somewhat similar to the Schedule of Appropriations and Payments report. For each grant, the report lists its original amount, the opening balance at the beginning of the current fiscal year ("current" as determined by the "as of" date), as well as any Payments and/or grant amendments made in that fiscal year by the "as of" date. From these data, the report then calculates the closing (or remaining) balance on the "as of" date.

The key difference in the Grant Continuity Schedule by Local Currency is that it reports only grants with a local/other currency specified, and the amounts shown are the local/other amounts.

Important: Throughout the section describing this report, the phrase "current year" refers to the fiscal year of the "as of" date chosen at the time the report is run.

About the Report Data

In order to understand the data found in the Continuity Schedule reports, you should understand the calculations used in each column of the report:

Column	Contents
Grant #	The Request ID number.
Name	The name of the grantee Organization.
Decision Date	The Request's Disposition Date.

Column	Contents
Currency	The local/other currency in which the grant has been calculated.
Original Grant	The grant's original local/other amount.
Opening Balance	<i>If the Request's Fiscal Year is prior to the current year, the amount is equal to:</i> ❖ the Request's original Local/Other Amount <i>plus</i> ❖ the sum of all Local/Other Amendment Amounts for grant amendments done before the beginning of the current year <i>minus</i> ❖ the sum of all Local/Other Payment Amounts paid before the beginning of the current year. <i>If the Request was approved during the current year, zero.</i>
Approvals	The original local/other amount for the Request, <i>if</i> it was approved during the current year (on or before the "as of" date). Otherwise, zero.
Payments	The sum of local/other amounts of all Payments paid, voided, or refunded during the current year (on or before the "as of" date).
Amendments	The sum of local/other amounts of all grant amendments done during the current year (on or before the "as of" date).
Closing Balance	= Opening Balance + Approvals + Payments + Amendments. In effect, it shows the current remaining balance of the grant (in the local/other currency) as of the "as of" date.

Running the Report

When you run this report, setting the "as of" date is key to reporting data correctly. When you set "as of" date to a date other than the current date, your report is affected in the following ways:

- ❖ When the report selects information relevant in the "current year," the current year is based on the "as of" date, not the current date.
- ❖ To be included in the report, the Request must have been approved on or before the "as of" date.

- ❖ For the report to consider a Payment paid (rather than scheduled), the Payment Date must be on or before the “as of” date.
- ❖ Report calculations that consider void and refunded Payments exclude these voids and refunds if their Payment Dates are after the “as of” date.

This report has been designed to recreate your data based on the “as of” date, but some data—once it is altered in GIFTS—cannot be restored to its past condition; therefore, the results of reports run with the “as of” date may not completely represent a version of the financial data as of that date. The following data cannot be accurately recovered based on “as of” date.

- ❖ Payments that have been deleted are not reflected.
- ❖ Payments for which the amount changed between the “as of” date and the current date report the current amount, not the previous amount.

Which Grants Are Included in the Report?

Only Requests with a local/other currency—and which were approved on or before the “as of” date—are included in the report. In addition, those Requests are included only if they *also* meet *at least one* of the following criteria:

- ❖ The approval date (i.e., the Disposition Date of the approved Request) falls within the current year.
- ❖ The Request was amended in the current year. (That is, it is associated with at least one Grant Amendment Activity with a Done Date within the current year.)
- ❖ The Request has at least one Payment within the current year. (That is, the Request has at least one Payment with a status other than Canceled with a Budget Fiscal Year within the current year.)
- ❖ The Request still had some unpaid balance at the beginning of the current fiscal year.

You can further refine these criteria by selecting or creating a search before running the report.

To view your report after you have specified the necessary options, choose File ► Run Report from the Report Library menu. The report is generated and displayed in the Active Report Viewer:

Grant Continuity Schedule in Functional Currency

If you use GIFTS multi-currency features to track grant amounts in other currencies (based on currency exchange rates saved in the Administrator Module), the Grant Continuity Schedule reports provide information about grants' balances, Payments, Amendments, and other changes in either your functional currency or the grants' local/other currencies.

Caution: If any Payment for a Request with one local/other currency has been calculated into a different local/other currency, the data for that Request will be incorrect.

About the Report

The report for Functional Currency displays much the same data as the Local Currency version found on page 95. It is only available, however, if you track historical exchange rates. Exchange rates change and can be updated in GIFTS over time; if you 1) keep a historical record of previous exchange rates and 2) allow some or all multi-currency Requests and Payments to adjust their *functional* amounts when GIFTS system exchange rates are updated, you can use this report to see—in addition to the other data—the net increase or decrease in the functional grant amount during the current year due to exchange rate changes.

Important: Throughout the section describing this report, the phrase “current year” refers to the fiscal year of the “as of” date chosen at the time the report is run.

About the Report Data

In order to understand the data found in the Continuity Schedule reports, you should understand the calculations used in each column of the report:

Column	Contents
Grant #	The Request ID number.
Name	The name of the grantee Organization.
Decision Date	The Request's Disposition Date.
Currency	The local/other currency in which the grant has been calculated.
Original Grant	The grant's original local/other amount.
Opening Balance	If the Request's Fiscal Year is prior to the current year, the amount is equal to: ❖ the Request's original Local/Other Amount <i>plus</i> ❖ the sum of all Local/Other Amendment Amounts for grant amendments done before the beginning of the current year <i>minus</i> ❖ the sum of all Local/Other Payment Amounts paid before the beginning of the current year. The result of these calculations is then converted to your <i>functional</i> currency, based on the exchange rate in effect on the last day of the year before the current year. If the Request was approved during the current year, zero.
Approvals	The original functional amount for the Request, <i>if</i> it was approved during the current year (on or before the "as of" date). Otherwise, zero.
Payments	The sum of functional amounts of all Payments paid, voided, or refunded during the current year (on or before the "as of" date), <i>shown as a negative number</i> .
Amendments	The sum of functional amounts of all grant amendments done during the current year (on or before the "as of" date).

Column	Contents
Translation G/L	This shows your gain/loss based on exchange rate changes between the first day of the current year and the “as of” date, by performing the following calculation: $= \text{Closing Balance} - (\text{Opening Balance} + \text{Approvals} + \text{Payments} + \text{Amendments})$ This may be a positive or negative number.
Closing Balance	This figure is calculated as: ❖ the Request’s original Local/Other Amount <i>plus</i> ❖ the sum of all Local/Other Amendment Amounts for grant amendments done on or before the “as of” date <i>minus</i> ❖ the sum of all Local/Other Payment Amounts paid, voided, or refunded on or before the “as of” date The result of these calculations is then converted to your <i>functional</i> currency, based on the exchange rate in effect on the “as of” date. In effect, it shows the current remaining balance of the grant (in the local/other currency) as of the “as of” date.

Running the Report

When you run this report, setting the “as of” date is key to reporting data correctly. When you set “as of” date to a date other than the current date, your report is affected in the following ways:

- ❖ When the report selects information relevant in the “current year,” the current year is based on the “as of” date, not the current date.
- ❖ To be included in the report, the Request must have been approved on or before the “as of” date.
- ❖ For the report to consider a Payment paid (rather than scheduled), the Payment Date must be on or before the “as of” date.
- ❖ Report calculations that consider void and refunded Payments exclude these voids and refunds if their Payment Dates are after the “as of” date.

This report has been designed to recreate your data based on the “as of” date, but some data—once it is altered in GIFTS—cannot be restored to its past condition; therefore, the results of reports run with the “as of” date may not completely represent a version of the financial data as of that date. The following data cannot be accurately recovered based on “as of” date.

- ❖ Payments that have been deleted are not reflected.
- ❖ Payments for which the amount changed between the “as of” date and the current date report the current amount, not the previous amount.

Which Grants Are Included in the Report?

Only Requests with a local/other currency—and which were approved on or before the “as of” date—are included in the report. In addition, those Requests are included only if they *also* meet *at least one* of the following criteria:

Grant Payment Summary

A comprehensive summary of Payment information for Approved Requests, including the total number of Payments, the amount granted, the amount scheduled (including held and contingent Payments), the amount paid, and any unscheduled balance. It also includes the next Payment's Schedule Date and the amount of the next Payment due.

Fixed Criteria

Scheduled, Contingent and Hold Payments for Approved Requests.

Variations

The "by Payee" variation of this report lists grants by the payee Organization instead of the grantee. Grants with Payments to more than one payee are listed more than once (once per each payee), so the Grant Amount and Balance Amount totals are not included

Schedule of Appropriations and Payments (version 6)

A new version of the Schedule of Appropriations and Payments report—sometimes called the IRS 990 report—has been introduced with the release of GIFTS 6. The previous version of the report is still available, and is described on page 123.

The new version of the Schedule of Appropriations and Payments report offers the following improvements and changes:

- ❖ *The report runs much faster now.*

Previously, clients with large databases often found that the Schedule of Appropriations and Payments report could take several hours to run. The new report significantly reduces report run time.

- ❖ *Calculation methods have been changed to provide more accurate reporting.*

If you are going to be running or reading the new Schedule of Appropriations and Payments report, you need to understand the calculations that went into the data within it. For details, please see “About the Report Data” on page 118.

- ❖ *The report uses a new report control, ActiveReports.*

Other standard GIFTS reports are generated using Crystal Reports. This new report uses a new reporting control, ActiveReports from Data Dynamics, Ltd. This reporting tool is also used for ad hoc reporting.

About the Report Data

In order to understand the data found in the new Schedule of Appropriations and Payments report, you should understand the calculations used in each column of the report:

Column	Contents
Recipient and/or Purpose	This column draws from a number of GIFTS fields to provide data about the grantee Organization and the Request for which Payments were made: ❖ First is the Legal Name of the grantee Organization. (If the Legal Name is blank, the Organization Name is used.) This is followed by the grantee Organization's Address, City, State, Zip code, and Country. ❖ Information about the grant follows: the approved Request's Project Title, Grant Amount, and Fiscal Year.
Tax Status	The Tax Status of the grantee Organization.
Beginning Balance	This column shows the unpaid balance of the approved Request at the beginning of the "current" fiscal year (based on the "as of" date). It is calculated as follows: ❖ If the Request was approved during the current fiscal year, the beginning balance is zero (\$0.00). (The grant amount will be included in the next column, Newly Allocated.) ❖ If the Request was approved before the "current" fiscal year, the beginning balance is the original grant amount <u>plus</u> the amount of any grant amendments made <i>before</i> the current fiscal year <u>minus</u> the total amount of any Payments made <i>before</i> the current fiscal year. (The total amount of any grant amendments made <i>during</i> the current fiscal year will be included in the Amended column (see below).)
Newly Allocated	If the Request was approved during the current fiscal year, the original grant amount is shown here. Otherwise, the Newly Allocated amount is zero (\$0.00).
Amended	The sum of the amounts of all grant amendments made during the current fiscal year. If the Request had no grant amendments made during the current fiscal year, the Amended amount is zero (\$0.00).

Column	Contents
Amount Paid	The sum of the amounts of all paid, refunded, and voided Payments that meet the following criteria: ❖ The Fiscal Year of the Payment is the current fiscal year. ❖ The Payment Date falls before the report's "as of" date.
Ending Balance	The Beginning Balance <u>plus</u> the Newly Allocated amount <u>plus</u> the Amended column amount <u>minus</u> the Amount Paid.
Population Served	The Population Served indicated in the Request Coding Sheet. If no Population Served code is included, the column is blank. NOTE: This column appears only if you run the Schedule of Appropriations and Payments Showing Population Served version of the report.

Running the Report

When you run this report, setting the "as of" date is key to reporting data correctly. When you set "as of" date to a date other than the current date, your report is affected in the following ways:

- ❖ When the report selects information relevant in the "current year," the current year is based on the "as of" date, not the current date.
- ❖ To be included in the report, the Request must have been approved on or before the "as of" date during the "current" fiscal year.
- ❖ For the report to consider a Payment paid (rather than scheduled), the Payment Date must be on or before the "as of" date.
- ❖ Report calculations that consider void and refunded Payments exclude these voids and refunds if their Payment Dates are after the "as of" date.

This report has been designed to recreate your data based on the "as of" date, but some data—once it is altered in GIFTS—cannot be restored to its past condition; therefore, the results of reports run with the "as of" date may not completely represent a version of the financial data as of that date. The following data cannot be accurately recovered based on "as of" date.

- ❖ Payments that have been deleted are not reflected.

- ❖ Payments for which the amount changed between the “as of” date and the current date report the current amount, not the previous amount.

Which Grants Are Included in the Report?

Only Requests that were approved on or before the “as of” are included in the report. In addition, those Requests are included only if they *also* meet *at least one* of the following criteria:

- ❖ The approval date (i.e., the Disposition Date of the approved Request) falls within the current year. (Note that the “current year” is the fiscal year within which the “as of” date falls.)
- ❖ The Request was amended in the current year. (That is, it is associated with at least one Grant Amendment Activity with a Done Date within the current year.)
- ❖ The Request has at least one Payment within the current year. (That is, the Request has at least one Payment with a status other than Canceled with a Budget Fiscal Year within the current year.)
- ❖ The Request still had some unpaid balance at the beginning of the current fiscal year.

As noted in the report instructions, you can further refine these criteria by selecting or creating a Payments search before running the report.

The cumulative effect of these criteria is to find only those approved Requests (grants) that saw decreases (i.e., payments) or increases (i.e., original grants and/or grant amendments) in their balances during a given fiscal year. The report then calculates the amounts of these payments and appropriations.

To view your report after you have specified the necessary options, choose File ► Run Report from the Report Library menu. The report is generated and displayed in the Active Report Viewer:

Schedule of Appropriations and Payments

You can use the Schedule of Appropriations and Payments reports to generate your IRS 990 reports. These reports show your commitments at the beginning of the year, the amount appropriated during the course of the year, the amount paid during the year, and your outstanding commitments at the end of the year.

About the Report Data

The report includes the following information for grants within a given year.

Column	Description
Recipient	The legal name and address of the recipient Organization, the Project Title of the grant, the total Grant Amount, and the grant's Fiscal Year. (In GIFTS, a grant's Fiscal Year is based on the date on which it was Approved.) If no legal name is on file for the Organization, it's Organization Name is shown.
Tax Status	The tax status of the recipient, as indicated on the Tax Status tab of its Organization record.
Beginning Balance	The amount that you have committed to pay for the grant as of the beginning of the year. For grants made in previous years, this is the remaining balance. For grants made during the current year, this amount is always zero.
Newly Allocated	The amount appropriated to the grant during the current year. If the grant was approved in the current year, this value is the total grant amount.
Amended	If the grant was amended during the current year, this value reflects the amount of the amendment.

Column	Description
Amount Paid	The amount paid during the current year. Note that this amount is calculated based on the Fiscal Year specified in the grant's payments, not on the Scheduled Date or Paid Date of the Payments. Note: If you “pre-pay” grants when you have extra funds in your budget at the end of a year, be careful to ensure that the Fiscal Year indicated in the Payment record properly reflects the year in which you wish to report it to the IRS. Example: If you pay a Payment that was scheduled for February 2001 in December 2000 because you have available funds, this report reflects the Fiscal Year assigned to the Payment, not the Paid Date.
Ending Balance	The remaining commitments for this grant, including Payments scheduled in future years and Payments scheduled for the current year that have not been paid.

Running the Report

When you run this report, you should set the ‘as of’ date of the report to the end of the year on which you wish to report. If you want, for example, to generate a report for your 2000 IRS reporting, set the ‘as of’ date to December 31, 2000. Thus, the report generates data for 2000—even if you are running the report while you prepare your taxes in April 2001.

You should always set the ‘as of’ date to December 31 of the year on which you want to report. The ‘as of’ date ensures that the report reflects only what you have done up to that date. With an ‘as of’ date of 12/31/00, Payments that your organization paid in 2001 would be shown as outstanding in the report because they were outstanding *as of* 12/31/00.

Which Grants are Included in the Report?

The report includes grants that have an open balance or for which appropriations were made during the year. Specifically, the report includes:

- ❖ Grants that are approved or amended within the year.

- ❖ Grants with Payments that have been scheduled or paid within the year. (**Reminder:** the reported date of the Payment is based on the Payment's Fiscal Year, not its Paid Date.)
- ❖ Grants with a balance as of the beginning or end of the year. Only grants with Scheduled Payments are included.

Note: The report uses Payment data to make its calculations. If a grant does not have any Payments, it is not included in the report—even if it has an open balance within the year.

Note that future grants are not included. If you run the report 'as of' December 31, 2000, grants approved in 2001 or later are not included.

Fixed Criteria

Requests that have an unpaid balance or for which appropriations were made during the year.

BACKGROUND

The Sunflower House is a social service agency which has served the Bay area for over 5 years. The center started as a food pantry and soup kitchen but has since devoted more of its resources towards the support and rehabilitation of our homeless children.

The center provides shelter, food and education to teenagers and youths who have made the street their home. Their goal is to re-unite the youths with family members whenever the situation permits it.
